Sustainability Excellence

Triovest Sustainability Solutions (TSS) is a centre of excellence providing leadership, resources, and services to both internal Triovest teams and external clients. Our expertise incorporates the full spectrum of sustainability, energy management, technology integration, and health and safety. TSS is guided by a proactive outreach strategy, focused on holistic sustainability and wellness principles to help our properties achieve their operational efficiency, green certifications, and net zero emissions objectives.

Accessibility

Triovest treats every property we manage as a community, a workplace that embodies diversity, equality, and inclusion. Our assets are inclusive environments that support diverse perspectives and accessibility, delivering the best possible experience to those who interact within our buildings.

Smart Buildings

Our cloud-based tenant experience app, Triovest Access, seamlessly connects tenants with their building and community. It facilitates communication, allowing tenants to quickly and easily submit service requests, find out what is happening in their building and surrounding neighbourhood, take advantage of exclusive offers, and connect with others within the building community. The app also allows property managers to post news and notices, scheduled maintenance alerts, and tenant handbooks.

TSS is using digital platforms to continuously pull data from building automation systems and identify operational improvement opportunities that drive sustainability performance and financial optimization. We strive to achieve smart building standards across our portfolio in an effort to reduce operating expenses, improve environmental metrics and enhance tenant experiences.

Our Commitments

We have set science-based aligned targets for our properties to manage utility costs, greenhouse gas (GHG) emissions, and waste.

We are committed to:

- ▼ Net Zero Operations by 2050
- ▼ 50% reduction in Carbon footprint by 2030 in our office portfolio
- ▼ Waste Diversion rate of 70% by 2030
- ▼ Occupational health and safety of our employees, tenants, contractors, and visitors
